Q10 Please provide any comments about the types of articles that JMLA publishes.

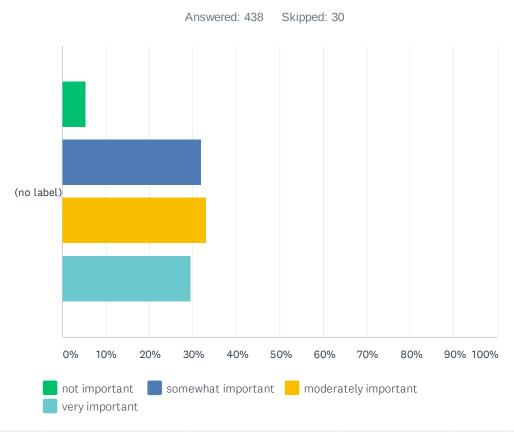

Answered: 55 Skipped: 413

#	RESPONSES	DATE
1	I honestly enjoy them all. I don't have time to read all of them right when they are published, but I've found so much helpful content at the point of need, so even at a later date the articles are helpful to me. In terms of data, I find it most helpful when I can find the survey instruments that are used in studies - because often I can fashion mind from theirs (and give proper attribution, of course).	7/20/2020 4:26 PM
2	They are timely, current and to the point. Very useful work done by medical librarians.	7/19/2020 8:30 PM
3	I like review articles, articles about librarian projects, new resources, librarians working in other countries	7/16/2020 6:07 PM
4	Most value to me are the ones that I can get new ideas from and then apply	7/16/2020 11:34 AM
5	They are mostly focused on university/academic institutions that bear zero resemblance to what hospital librarians do or need. I don't have "staff"; I have ME. MLA does not address this and while I hope that the influx of hospital librarians recently helps, it's an institutional CHOICE to ignore over half your membership. I don't know if it is half, but it's certainly a significant percentage, those of us who are left, that is, another issue MLA had pretty much ignored; heaven knows there's never been an public advocacy or press release regarding the loss of hospital librarian positions. We feed you and the NLM. Y'all need to recognize and appreciate that If you aren't getting hospital librarian research, foster it, all the way to publication. Work with NLM (hello?) from grant to proof. Then you/we will have articles that are pertinent to me.	7/16/2020 9:46 AM
6	JMLA almost never contains any content interesting to my field of practice. I rely on other library journals.	7/16/2020 9:35 AM
7	They are very specialized and focused in a certain topic. They are relevant of that area of investigation. Thanks.	7/16/2020 9:17 AM
8	N/A	7/14/2020 8:47 AM
9	It's heavy on the academic site and I struggle to find value or application in the content as a hospital librarian.	7/13/2020 9:26 PM
10	informative	7/9/2020 12:04 PM
11	I would like to see more on Justice, Equity, Diversity, and Inclusion work. This should really just be a standard of the profession at this point and I don't see it represented as much in this journal, that is why I read it less.	7/9/2020 11:57 AM
12	Not exciting	7/9/2020 1:13 AM
13	Frankly, I read JMLA a lot more often when I received a print copy. Lately I have only read it when something peaked my interest or if I am doing research of some sort	7/8/2020 2:32 PM
14	A variety is essential!	7/8/2020 2:10 PM
15	A good variety for the many areas of readership	7/8/2020 11:33 AM
16	Love the Jmla and look forward to it.	7/7/2020 8:06 PM
17	I appreciate knowing which articles receive review status for AHIP credit. Overall, the article topics are relevant and timely. Is it time to leave the "issue" concept and publish when available? On second thought, never mind.	7/7/2020 5:06 PM
18	I like the structured abstracts	7/7/2020 3:39 PM
19	Highly relevant to the profession, but not necessarily meeting my immediate needs while I'm in the profession.	7/7/2020 2:54 PM
20	There seem to be fewer research (RCTs, large surveys, and other empirical methods), articles on the value of health science libraries, services and collections, than there were 5 years or so ago. Is this by design or are our researcher/authors just doing less of this?	7/7/2020 2:40 PM
21	I often wish that there were more practical "how to" articles.	7/7/2020 2:35 PM
22	I deal with electronic resources. It seems that many of the articles and webinars have moved away from that and there is a lot more on public services. There seems to be less content that is relevant to my needs.	7/7/2020 2:05 PM

22		
23	As far as case reports, I'm guessing this is also referring to Case Studies. I prefer reading about best practices in library settings similar to mine.	7/7/2020 1:42 PM
24	Hard to define just one column as valuable, rather I read what interests me	7/7/2020 12:54 PM
25	All are important	7/7/2020 12:47 PM
26	Would like to see articles including explanation of number of library staff needed for project/automation/service/resource access to succeed to help hospital librarians justify full-time positions for more than one librarian.	7/7/2020 12:39 PM
27	quality has improved over the years	7/7/2020 11:59 AM
28	I love the resource reviews, commentaries, editorials, book reviews, etc I honestly don't have a lot of time to read the in-depth research studies published by librarians.	7/7/2020 10:53 AM
29	You rarely have any material about technical services, and SO MUCH about systematic reviews (although it's better than it used to be.) I'd love to read more articles having to deal with ILL, cataloging, and other tech services topics as they relate specifically to medical librarianship.	7/7/2020 10:42 AM
30	I miss the fact that there are not much advanced research articles for advanced medical library professionals.	7/7/2020 10:40 AM
31	I especially appreciate "how to" or "how we did it" type articles.	7/7/2020 10:33 AM
32	I really enjoy the projects on "mapping the literature"	7/7/2020 10:23 AM
33	I've been a JMLA reader for decades and have seen some real ups and downs in terms of editorial control. Lately things have been better! The fact that MLA does not publish conference proceedings means that JMLA has a very important role to play in disseminating the research work relevant to medical librarianship. JMLA's standards need to remain high or we'll turn into the Journal of Hospital Librarianship!	7/7/2020 10:14 AM
34	Mostly innovative	7/7/2020 9:40 AM
35	I am looking more for the application of processes in the healthcare setting/hospital setting. Many times the research oriented pieces become too technical to make sense of how to apply the knowledge.	7/7/2020 9:38 AM
36	Find the articles not really relevant to the hospital library setting and too many topics that aren't applicable in multi-site libraries.	7/7/2020 9:12 AM
37	n/a	7/7/2020 8:50 AM
38	More research, both qualitative and quantitative is needed in this profession. Those are the articles of interest for further research and for showing information science and librarianship as a serious, scholarly, and actionable profession, contributing to its growth and ability to serve its communities.	7/7/2020 8:49 AM
39	It would be great to have more theory-based papers.	7/7/2020 7:48 AM
40	I find articles in JMLA much less informative than articles in other journals. Articles about technology are narrowly focused and repetitive.	7/7/2020 7:31 AM
41	Really enjoyed the recent piece about Outlander	7/7/2020 7:22 AM
42	The quality is usually great, but I would love to see more items about clinical librarianship.	7/7/2020 7:19 AM
43	I don't find much that I really need to read.	7/7/2020 7:18 AM
44	Most of them are way too academic to have relevance in a busy clinical setting.	7/7/2020 5:58 AM
45	All are great as peer-reviewed.	7/7/2020 5:49 AM
46	They are the referent. The route to follow.	7/7/2020 5:10 AM
	anguid nanara ara impartant and it about has comprehensive information	7/7/2020 3:20 AM
47	special papers are important and it should has comprehensive information	11112020 3.20 AIVI

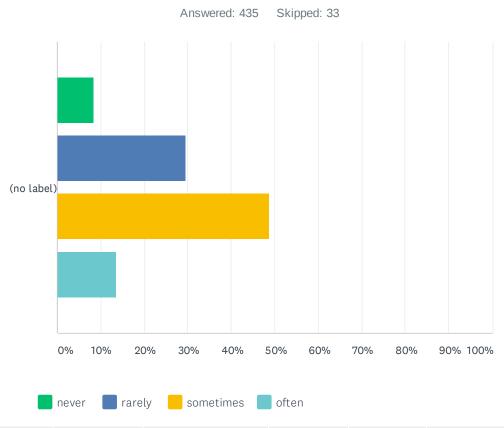

49	as a retired practitioner and slis professor, I enjoy seeing what my former colleagues and former students are writing	7/6/2020 9:12 PM
50	Trust worthy.	7/6/2020 9:00 PM
51	Articles about filters, database search techniques, and process of systematic reviewing are of great interest.	7/6/2020 8:51 PM
52	often not very relevant to my area of practice	7/6/2020 8:34 PM
53	Too many articles that are too research-heavy. I'd prefer more case studies, summaries of outreach projects, problem-solving ideas, overviews from different voices.	7/6/2020 7:53 PM
54	Case reports are often the most useful and relevant to my work.	7/6/2020 7:20 PM
55	A lot of it is not pertinent to my current position	7/6/2020 7:16 PM

Q11 How important is it for you to be able to access the appendixes and/or data associated with JMLA articles?

	NOT IMPORTANT	SOMEWHAT IMPORTANT	MODERATELY IMPORTANT	VERY IMPORTANT	TOTAL	WEIGHTED AVERAGE
(no label)	5.48% 24	31.96% 140	33.11% 145	29.45% 129	438	2.87

#	RESPONSES	DATE
1	None	7/20/2020 4:26 PM
2	The archives are very helpful.	7/20/2020 11:19 AM
3	It's ok, just not as easy to find/use as the PMC archives	7/19/2020 9:45 PM
4	It is very useful.	7/19/2020 8:30 PM
5	It is a fast and an effective website	7/18/2020 4:19 AM
6	JMLA is a valuable journal, and I regularly review the TOC of each new issue for relevance and often refer articles to colleagues	7/16/2020 9:49 PM
7	the search function is not very good	7/16/2020 6:07 PM
8	It's a little tedious navigating between issues.	7/16/2020 10:15 AM
9	The site is fine, but I admit that I more often access things via PMC.	7/16/2020 10:04 AM
10	It's completely hidden. Not aware of it at all. That may be me, but I don't see it promoted much at all. Why y'all don't want to promote your journal, which is well done and well thought of, escapes me, but you need a serious marketer.	7/16/2020 9:46 AM
11	It is a very useful resource.	7/16/2020 9:17 AM
12	N/A	7/14/2020 8:47 AM
13	it is kind of clunky and not super easy for searching and going between articles	7/14/2020 7:00 AM
14	The site is not robust, the color scheme is hard on the eyes (light mint color) and I think it could be greatly improved.	7/13/2020 9:26 PM
15	easy to navigate	7/9/2020 12:04 PM
16	Don't use very often	7/9/2020 11:59 AM
17	I have never looked at it.	7/9/2020 7:05 AM
18	Perpetually difficult to access	7/9/2020 1:13 AM
19	Unless I am looking for something specific, I rarely go on the site.	7/8/2020 2:32 PM
20	It would be nice to have the pdf/html links at the top of the individual articles for easy access. I would also like the HTML full text to be on the main page and not have to click for that. Linking to cited JMLA articles in the references on the abstract page would be useful too.	7/8/2020 11:42 AM
21	I think it's just right for the content and what is is being used for.	7/8/2020 10:33 AM
22	I feel like there is an excessive amount of clicking to actually get to the article I want.	7/8/2020 10:32 AM
23	It's not well suited to searching and the OJS layout is a bit old fashioned	7/8/2020 5:23 AM
24	Just 'OK.'	7/8/2020 3:46 AM
25	I'll say the same thing to you that I say to all publishers: appendices and data should be included in the same PDF as the article. There is no reason to make someone have to hunt down data/an appendix in a separate link.	7/7/2020 5:11 PM
26	the green decorative image at the top is incredibly large.	7/7/2020 4:11 PM
27	I found it hard to navigate sometimes, can't find what i need	7/7/2020 3:54 PM
28	I usually only link to the website through the toc when it's emailed to us. I read a couple of articles then, but when I receive the print copy I read it cover to cover.	7/7/2020 3:40 PM
29	N/a	7/7/2020 3:39 PM
30	Never go to the website directly. Always go via the emailed issue links.	7/7/2020 2:54 PM
31	I usually end up in PMC from search results - I just looked at it - the font is off-putting and the	7/7/2020 2:43 PM

32	It seems redundant when JMLA is also available at PMC.	7/7/2020 2:35 PM
33	I like being able to track my training and CEs	7/7/2020 2:05 PM
34	Since I think the entire MLA website is a mess, the JMLA website isn't much better	7/7/2020 1:56 PM
35	I am not really aware of JMLA website, I think of it as the MLA website	7/7/2020 12:54 PM
36	Inaccessible to me	7/7/2020 12:47 PM
37	Search feature works very well. Link from search results goes to journal issue not direct to article. Why?	7/7/2020 12:39 PM
38	It seems a little outdated	7/7/2020 11:48 AM
39	I'm neutral - I don't really use it.	7/7/2020 11:48 AM
40	rarely go there	7/7/2020 10:47 AM
41	Those blue links are hard to read.	7/7/2020 10:42 AM
42	I do not have any particular comment at this time.	7/7/2020 10:40 AM
43	I think today is the first day I have used the JMLA website. It seems easy to navigate, but I have only looked at the current issue.	7/7/2020 10:33 AM
44	Can be cumbersome to use particularly for the submission process.	7/7/2020 10:17 AM
45	Online-First (ahead of print) paper would be helpful	7/7/2020 9:40 AM
46	It's fairly plain, but that makes it easier to find stuff.	7/7/2020 9:23 AM
47	Question 12 is hard to answer I frequently want to access supplemental material but it's not available. I was amazed when I learned that the pre-2017 supplemental material related to JMLA articles is not available on the journal site, and that JMLA leaders don't plan to do anything about it because of the cost and human effort. It's really a physician heal thyself situation librarians would rake any other journal over the coals for this. It's a breach of trust with the readers who can't access supplemental materials and it's a breach of trust with the authors, who may have assumed that the journal was taking on the responsibility of archiving and making available the supplemental materials they had uploaded.	7/7/2020 8:59 AM
48	n/a	7/7/2020 8:50 AM
49	Old fashioned and cumbersome, but usable	7/7/2020 8:48 AM
50	I've never been on the JMLA website. Didn't know about it.	7/7/2020 8:30 AM
51	It's fine for current issues, but finding previous issue content is more difficult and the search box is not particularly useful.	7/7/2020 7:36 AM
52	The website design and navigation looks outdated and unprofessional.	7/7/2020 7:31 AM
53	None	7/7/2020 7:18 AM
54	Very good. It always shows the trending issues.	7/7/2020 5:10 AM
55	good and should provide free access to ebooks etc.,	7/7/2020 3:20 AM
56	It's very important to get the appendices of surveys, etc.	7/6/2020 11:58 PM
57	a bit cluttered	7/6/2020 8:34 PM
58	The website seems dated.	7/6/2020 7:13 PM
59	I hate all of the clicking through to get to the PDFs of articles. One click please!	7/6/2020 7:09 PM

Q15 Compared with other peer-reviewed journals for health sciences librarians and information professionals, what is the quality of JMLA? [choose one]

ANSWER CHOICES	RESPONSES	
Lower quality	1.17%	5
Similar quality	54.57%	233
Higher quality	44.26%	189
TOTAL		427

Q16 Please add any other comments about JMLA from a reader's perspective:

Answered: 56 Skipped: 412

#	RESPONSES	DATE
1	A really top outlet - where I'd be happy to publish as a tenure-track information science faculty member - and which is also accessible to colleagues who are working practitioners in libraries.	7/19/2020 9:45 PM
2	It reflects the most important work for our profession. Very helpful	7/19/2020 8:30 PM
3	I miss the more informal "how we did it well" articles. Suspect those stories are available on other platforms that I'm not using.	7/18/2020 10:16 PM
4	thanks! I am glad I have the email alerts because my work days are so busy, I'd miss the content!	7/17/2020 12:49 PM
5	JMLA is a useful resource for providing high quality information. Most issues provide at least one article (if not more) of interest and relevance to my work and interests.	7/16/2020 9:49 PM
6	I normally search for JMLA articles, when I have a library project to work on. I always scan the print issue when it comes in, and always find some interesting articles in it.	7/16/2020 6:07 PM
7	I still enjoy receiving the print copy - so portable - prompts me to read certain articles in depth - and I always know I can get back to other articles online. Keep up the good work!	7/16/2020 2:03 PM
8	Keep up the great work!!	7/16/2020 12:31 PM
9	Read it less now print no longer comes with membership. I'll scan thru the e-mails, but I used to always look at the ToC when I got the print and automatically start reading.	7/16/2020 11:34 AM
10	I appreciate the variety of articles that represent all phases of our profession	7/16/2020 11:20 AM
11	I appreciate JMLA regularity and good standard of publication.	7/16/2020 10:58 AM
12	I already did! But re the data and appendices. I may never access them in an index, but they should be accessible for anyone at anytime. We complain about medical books that remove the References from the end of chapters, do NOT do that to our own. Also, #7: I access both print and online (usually PMC), so why isn't that option available? You all do good, hard, important work. My beef is more with MLA than JMLA, but you're that mouthpiece, so you're a part of it. Keep up the good work, but keep improving. Stay well.	7/16/2020 9:46 AM
13	thanks for a great service	7/16/2020 9:38 AM
14	Thank you for your effort and professionalism.	7/16/2020 9:17 AM
15	JMLA is essential reading for a health sciences librarian! The content and editorial quality are excellent!	7/15/2020 6:48 PM
16	N/A	7/14/2020 8:47 AM
17	I am looking for content that will both support my professional development and assist me in keeping current in my profession. While I don't expect every article to apply to my work environment, I am a Medical Librarian working in a medical facility and this is the Medical Library Association.	7/13/2020 9:26 PM
18	I regard JMLA as the preeminent health sciences libraries journal.	7/13/2020 10:55 AM
19	I am super pleased with the quality of JMLA articles, I think they are the standard to which all Library Science articles should be held.	7/9/2020 4:35 PM
20	organization makes it easy to read	7/9/2020 12:04 PM
21	My one issue is the citation style requirement for in-text and end-of-text bibliographies. I would much prefer (Smith, 1988) to [1], and to have the bibliography organized by 1st author/last name. As an author this is a huge pain if revisions happen; as a researcher, I review the bib, scanning for seminal authors, and in consideration of the original intent for the in-text citation style, I wonder if it wasn't about saving space - no longer a needed element in online publications.	7/9/2020 11:53 AM
22	Distant, not engaged	7/9/2020 1:13 AM
23	JMLA does many things right. Thank you!	7/8/2020 2:35 PM
24	As a hospital librarian, I often find nothing of interest in JMLAbut as a member of a profession, I feel it is important to at least peruse the TOC.	7/8/2020 2:32 PM

25	Keep up the excellent work! Thanks to all volunteers.	7/8/2020 2:10 PM
26	JMLA is the journal for health sciences librarians. I love the fact that it's indexed in PubMed since those outside of librarianship are more likely to discover our work that way. I appreciate that it's open access but does not charge article processing fees. Finally, I feel that the rigor and quality of the work published has consistently improved over the last five or so years.	7/8/2020 5:23 AM
27	As a scientist and librarian, I look for articles that have an 'outward look' on the services for and needs of researchers. Many JMLA contributionsthus, their authors as welllook way too much onto their own profession. Moreover, the vast majority of US article authors/librarians lack any professional medical or scientific education. Thus, much of their activity is irrelevant and could be eliminated, and this pertains a fortiori to many JMLA articles.	7/8/2020 3:46 AM
28	Thank you JMLA editor and editorial staff.	7/7/2020 5:06 PM
29	JMLA is the best! I was so sorry to see SLA's journal go downhill. I am so grateful that JMLA has stayed on top!	7/7/2020 5:03 PM
30	The search text box could work better on the website. I understand if they decide to stop printing it, but I really enjoy the printed editions.	7/7/2020 3:40 PM
31	I am glad to have access to the body of knowledge related to medical librarianship. One suggestion: expand coverage of data science research related to our field.	7/7/2020 3:39 PM
32	I like having these issues indexed in PubMed.	7/7/2020 2:54 PM
33	JMLA is my favorite journal and I love that it is open access! I would never submit an article myself to a journal that is not open access.	7/7/2020 2:35 PM
34	I actually don't look at other peer-reviewed journals for librarians so my previous answer isn't very accurate.	7/7/2020 2:05 PM
35	Would like more information on what is new. Databases, & comparing items. Maybe a spot lights on items or things you need to know section. To know what is out there. Sometimes I feel lost or not informed when items are mentioned that I never heard about.	7/7/2020 1:32 PM
36	I read what interests me, not always the same article type	7/7/2020 12:54 PM
37	Thank you for your work to provide a great journal of medical librarianship!	7/7/2020 12:39 PM
38	JMLA is indispensable!	7/7/2020 11:48 AM
39	Honestly - keep the content a bit lighter? While I recognize the importance of scholarly work in our field, I'd like to see more coverage of day-to-day issues faced by Medical Librarians, rather than in-depth research studies. I'd like to see: A review of predatory publishing; a review of read and publish models, a review of libraries & COVID_19. I certainly appreciate all the work that goes in to detailed research studies, but my staff and I don't have time to participate in such studies. We are not required to publish (we're not faculty track). I'd love to see more practical information covered. Thanks for all the hard work, and thanks for asking for our input.	7/7/2020 10:53 AM
40	It would be great if there were some more high quality research studies for advanced medical library professionals. It might attract readers not limited to information professionals.	7/7/2020 10:40 AM
41	I have always appreciated the JMLA, receiving the print copies regularly when I was a younger librarian. Today I mostly rely on topic searches in LISTA to find the library literature I read, but now that I have discovered the JMLA website I may go there on a regular basis.	7/7/2020 10:33 AM
42	Question 14 worries me. There are topics that *only* health sciences librarians engage in research about, and there are topics for which JMLA is competing with medical informatics (to name only one other field). Many peer-reviewed journals for LIS are of very low research quality indeed, even if they serve a valuable community-building and tip-exchanging function for the field (tip-exchanging, in particular, is something I thought was killed by the Web in approximately 1993. I was wrong). Don't compare yourselves with only LIS publications! Compare yourselves with other Web of Science ranked publications in information science and medicine!	7/7/2020 10:14 AM
43	Please put the pre-2017 supplemental materials on the current JMLA site or into some kind of searchable data repository Figshare? OSF?	7/7/2020 8:59 AM
44	n/a	7/7/2020 8:50 AM

45	It is on the profession to provide the studies and data that would heighten the quality of JMLA. As it stands, it is a fine journal for a perception of librarianship held mostly by the public. We should see ourselves more as research practitioners. JMLA will evolve when the profession evolves. Until then, carry on, and thank you for all you do.	7/7/2020 8:49 AM
46	The work to improve the openness and transparency of our work is much appreciated.	7/7/2020 8:48 AM
47	I'd like to have a newsletter highlighting some articles sent more often than once a quarter.	7/7/2020 8:40 AM
48	I don't read the entire journal since it's online. If I had print, I would be more apt to read in its entirety. Not a fan of e-reading.	7/7/2020 8:30 AM
49	I find the journal content and website very disappointing.	7/7/2020 7:31 AM
50	I find JMLA articles to be highly theoretical, which makes relating the content to what I do challenging. I am excited to read the new Knowledge Synthesis articles and I have always enjoyed the Case Reports, Case Studies, and Virtual Project submissions.	7/7/2020 7:20 AM
51	I think most of the articles are for the benefit of the academic librarians CVs - JMLA gives them a place to publish. There's not much of practical use for the hospital librarian.	7/7/2020 7:18 AM
52	JMLA it is a mark.	7/7/2020 5:10 AM
53	very good	7/7/2020 3:20 AM
54	Sometimes i like to participate in the seminars and workshops of JMLA but its very expensive for me. Iran Sanctioned by America and Iran's currency hits lowest value ever against the dollar.	7/7/2020 12:59 AM
55	I appreciate that the articles are open access.	7/6/2020 7:20 PM
56	I wish the focus was a little broader	7/6/2020 7:09 PM
